

# Provide access to fast answers and trusted content.

One of the most trusted names in medical information is making clinical content more accessible. With ClinicalKey, your students and faculty will be able to find the answers they need from the brands they rely on and recognize.

ClinicalKey is optimized for mobile use, making the discovery, application and sharing of clinical content simple. It helps faculty teach better and students to learn better with a variety of content types and the ability to share information easily.

Whether it's your single source for medical content or a complement to the clinical reference tools your school already uses, ClinicalKey helps you provide your faculty and students with relevant answers whenever and wherever they need them.

#### For students

- Topic Pages on more than 1,400 *disease conditions* provide a comprehensive overview, with resource links for a deeper dive.
- Access more than 17,000 *medical and surgical videos* for visual learning.
- *Presentation Maker* eases the process of sharing, manipulating and storing content for later use.

#### For faculty

- Access to *trusted, evidence-based content* to create syllabi, save items for future reading and more from over 1,000 reference books and 600 leading journals.
- Create multimedia presentations within ClinicalKey to aid in preparing your classroom lectures.

#### Other ClinicalKey features

- **Smart Search** works as soon as you start typing, offering shortcuts to topic overviews and related clinical concepts. The **most clinically relevant results** flow to the top of the results page every time.
- Access to the **industry's most complete collection** of medical and surgical content—indexed daily.
- **Optimized for mobile use**, ClinicalKey lets users find the information they **need at their institutions or on the go**.
- **Retained search history** lets users view past sessions. Search results can be **emailed**.
- Ability to tag **content in Saved Items**, which allows users to easily access the files for future reading and reference.

### ClinicalKey benefits for librarians

- Inform your students and faculty of all that ClinicalKey has to offer with **videos, quick reference cards, web banners** and more in the **ClinicalKey Resource Center**.
- ClinicalKey offers free official **MARC 21 records** for the books, journals and Clinics included in your subscription that are ready to load into local library catalogs to **increase the discoverability and usage** of the ClinicalKey resources.
- **Durable URLs** let institutions add links to the most **frequently used content** or highlight content for a specialty service.
- **Detailed usage reports** help you understand what **content your students and faculty are using** and how often they're using it.
- Open **URL linking** can be added to ClinicalKey institutional accounts with Link Resolvers, giving you the option to **link to journal article search results**.
